If eye irritation persists; seek medical attention. **IF ON SKIN** wash with soap and water. If skin irritation occurs: seek medical attention.

Soil Applied with other nutrients: 1 pint to 1 gallon
Side dress or spray Applications without other nutrients: 1 pint per Gallon
Seed soaks, cuttings, and transplant solutions: One pint per gallon
Foliar Application: (In combination with other nutrients) 1-4 pints per acre.
Can be applied with or without other nutrients and directly to foliage.

Herbicide Applied: 1 pint per Acre. DO NOT MIX WITH SELECTIVE HERBICIDES. Can be mixed with non-selective contact herbicides **NOT RECOMMENDED WITH PRE-EMERGENCE HERBICIDES.**
Defoliant- Mix 1-2 pints per acre with all defoliant

DIRECTIONS FOR USE:

1 pint per acre throughout growing season(spring and fall).
Add approximately one-half of the desired water water to the spray tank before adding OroGro307. Agitate before adding remaining water, fertilizer, or pesticide (Add pesticide last).
Fertilizers and nutrient products with high levels of calcium may result in slight calcium-phosphate precipitation. For first time users: A compatibility test is recommended before full scale mixing. OroGro307 can be injected into irrigation systems along with fertilizers and pesticides approved for this use. When applied with pesticide, please follow the precautionary statements and directions for use listed on pesticide label.
OroGro307 may be applied by ground, air, or through irrigation systems. OroGro307 is compatible with most fertilizers and pesticides and is effective when applied to all crops and all soil types. OroGro307 is meant to add to your fertilizing routine NOT to replace it. Visit: goldnhumatesorogro307.com for more information.
OroGro 307 is not corrosive to hoses, pipes, or gaskets. The irrigation system must contain a functional check valve, vacuum relief valve, and low pressure drain appropriately located on the irrigation pipeline to prevent waterflow contamination from backflow. **Does Not Settle or Clog.**
